

Communication

15 September 1988

The ability to be a teacher is first having something to teach that you understand and believe in. Secondly, being able to convey the ideas and understanding to the student.

Communication is involved with many different levels. For example, as we are talking now we are communicating on many levels and the physical is the least.

Love is the agent that combats the element of fear. Fear is the breeding place of superstition, hatred, jealousy, and all the other negatives based in illusion that hold man in bondage through ignorance.

It would be well to send Divine Light and Love ahead into the class and yourself, that you would be an open channel for Spirit to work through; and into each mind to prepare the way for the seeds of Truth to be planted; and fill the room to overflowing where the class is to be held. The presence of Divine Love and Light in a class increases the probability of learning many times over.

If you feel the students will accept the ideas in a positive way it would be good to have them close their eyes and visualize Light coming into and flooding their minds, explaining that communication takes place on many levels of consciousness and this exercise will help the understanding to come down into the conscious physical mind much easier.

Also in your mind see a beam of Light going out from you to each student. In this way, you will have better contact with each student and each will have better contact with you.

You are there to learn as well as teach and if your channel of communication is open, you will learn something new with each class you teach no matter how many times you teach it.

**SUGGESTION:** My mind is now open to the Light of God's Love. Divine Light and Love fills me to overflowing and goes ahead of me paving the way, helping me to communicate with others and especially the students I am working with. I am now open to be a channel for God's Love and Light to work through me. New

understanding is filling my consciousness. I send this understanding out to those who will see and hear. Communication is taking place in the physical from the higher realms.

NOTES:           PLAY THE ROLE!!           DO YOUR HOMEWORK!!

To be a good teacher, you must be a good student. You cannot keep anything unless you give it away.

Be an open channel and let it come through. Let the God-being do the teaching.

Set the scene. Fill the area with Love, send Love into the class.

LOVE IS THE KEY TO LEARNING TO BE AN OPEN CHANNEL.

Teach to inspire and bring out the inner knowing. Give guidelines. Do not be concerned if the student learns or not. Everyone heals themselves. The students already know, but they don't realize it.

Call forth a being to be in your class and make the connections from Him to each student and to yourself.

Ask to be able to meet on other dimensions. Plant the seeds and release the student to God. Send Love to self to open channel and allow God to work for the best of the group/individual. Remember that you cannot do anything. Keep the physical personality out of it! Know humility. You are a tool.
